480 m

A death reported, October 2025

An offence causing death in the SPVM’s published reports within 500 m.¹ Police sector 38 reported homicides (4) and attempted murders (3), September 2025 to August 2026.²

3.8×

Vehicle theft, against the island’s rate

116 reported within 500 m in the twelve months, 1 per 102 residents against 1 per 393.¹

3.8×

Robbery, against the island’s rate

36 reported within 500 m in the twelve months, 1 per 329 residents against 1 per 1,250.¹

1.8×

Mischief, against the island’s rate

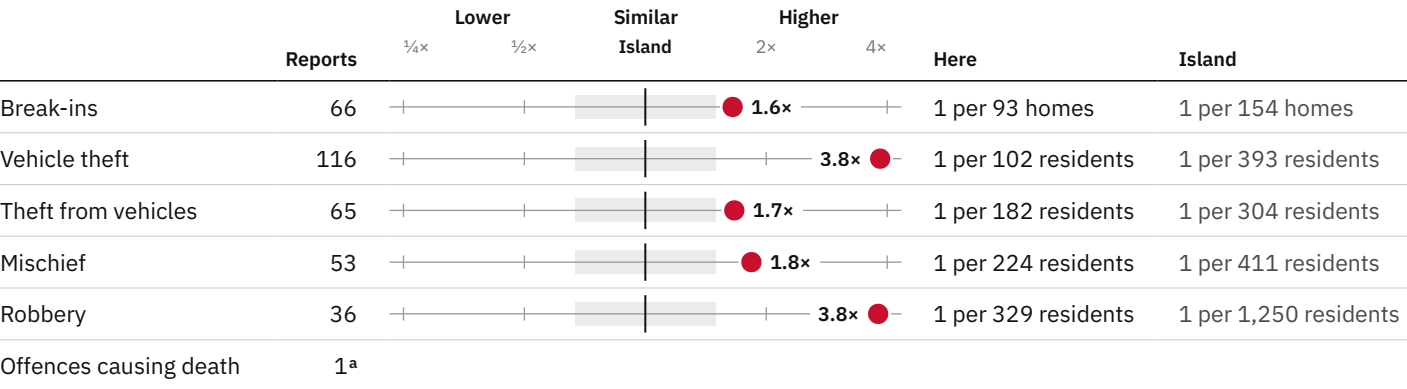

53 reported within 500 m in the twelve months, 1 per 224 residents against 1 per 411.¹

Summary

Published reports within 500 m, October 2025 to September 2026, each placed against the island of Montréal or, for 311 requests, the City. The grey band runs from 0.67 to 1.5 times the comparison rate.

Break-ins, vehicle theft, theft from vehicles, mischief and robbery: 1.6 to 3.8 times the island’s rate

442 m · 3 June 2025
Plateau-Mont-Royal | Homeless person injured by a sharp object (translated)
On Tuesday evening, a 49-year-old man was stabbed in an alley near the Mont-Royal metro station in Le Plateau-Mont-Royal and was taken to hospital.
[La Presse](#) · [Noovo Info](#) · [TVA Nouvelles](#)
17 events reported within 500 m; the 10 most serious are listed.
5 shootings, stabbings, beatings and deaths were reported in the press in the borough of Le Plateau-Mont-Royal since January 2015, without a street named.

Press-reported violence within 1 km
Press-reported shootings, stabbings, beatings and deaths within 1 km since 2015: 53, 1.7× the island’s rate for the number of people living here.⁵
This counts incidents the press covered, and covered incidents are the serious ones.

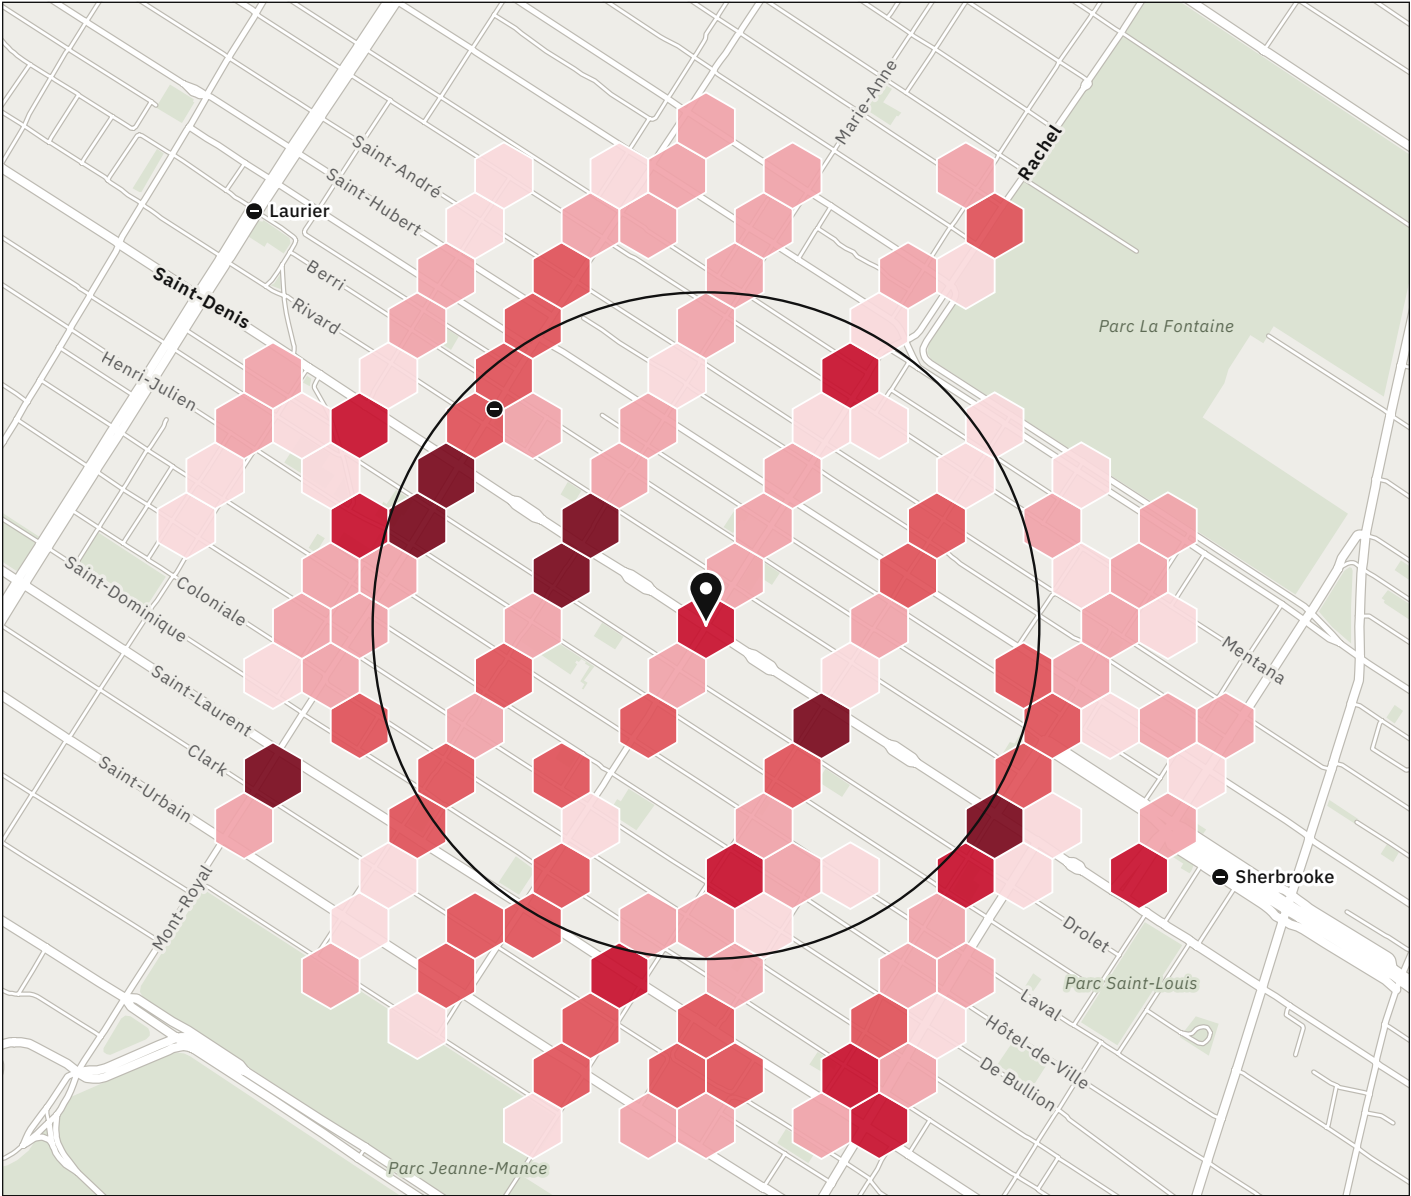

Coverage
Searched 11 outlets, January 2015 to August 2026 — 71,763 articles read.

Around the address

Reports published by the SPVM around the address, October 2025 to September 2026: the six categories together, by cell. The next page separates them.

The densest cell, 31 reports, lies at Marie-Anne and Saint-Denis, about 230 m north-west of the address

Figure 3 · SPVM reports, October 2025 to September 2026 · Counted in hexagonal cells 100 m across, out to 800 m · Cells per class in brackets · North up¹

Reports per cell 1–2 (32) 3–5 (51) 6–10 (27) 11–19 (10) 20+ (7) Rachel & Saint-Denis 500 m

The SPVM places every report at a nearby street corner, so a spot with no dot, even right by the address, does not mean nothing was reported there.

How to read this report

Questions to ask

Serious incidents nearby^{1,2,5}

Ask the seller or broker what they know about the incidents listed.

Vehicle theft: higher here than across the island¹

Ask about secured parking nearby and whether vehicles have been stolen from the area.

Robbery: higher here than across the island¹

Walk the route to transit in the evening before you decide.

Mischief: higher here than across the island¹

Ask about vandalism nearby and how quickly it gets cleaned up or repaired.

Homelessness and social cohabitation: higher here than across the City of Montréal³

Ask the borough about the services nearby.

Windows

The last twelve months are the complete months of October 2025 – September 2026 (a month is complete 7 days after it ends). The five 12-month periods run from October 2021 to September 2026; the long run covers 2015 to 2025. Below 10 reports, only the count is given, without a rate.

What stands out

What stands out follows fixed rules. First, serious incidents from a single event: deaths and press-reported violence within 500 m over five years, homicides and attempted murders in the police sector over the last 12 months. Then rates from at least 10 reports, here and in the comparison, that are 1.5 times the island's or more, or two-thirds of it or less, ranked by their distance from it; one finding below the island is always kept if there is one. Then changes since 2015 that differ from the island's by 15 points or more. At most five. The pooled comparison counts deaths within 1 km since 2015.

Rates

Rates divide reports by the people or homes within 500 m, from the 2021 Census. Visitors, commuters and parked cars are not counted there, so a busy street's rate per resident runs high.

Comparable corners

A comparable corner has the same street type and a street grid within 20% as dense, anywhere on the island (for 311 requests, inside the City). The share counts corners with fewer reports than here.

The scale

Each category's rate is placed on a scale from a quarter to four times the comparison rate, the island's (for 311 requests, the City's). The grey band, from 0.67 to 1.5 times, is where the method calls a rate similar; the same thresholds choose what stands out.

Under-reporting

About half of break-ins, vehicle thefts and robberies are never reported to police (Statistics Canada survey, 2019), so the real numbers are higher — here and across the island alike.

Break and enter: 45% reported to police. Theft of motor vehicles or their parts: 52% reported to police. Robbery: 47% reported to police. Statistics Canada flags this estimate: use with caution.

Source: Statistics Canada, Juristat 85-002-X, "Criminal victimization in Canada, 2019" (Cotter, 2021), Chart 7. National 2019 figures, never applied to a local count.

311 request types

The 311 figures count two request types as the City names them: "Needle pickups" and "Homelessness and social cohabitation".

The data

Data as of 12 October 2026 (latest SPVM report: 10 October 2026). Method 2026-10-04.4.
